

ENVIRONMENTAL GOALS

West has a long-standing commitment to environmental responsibility in our products, operations, and with the broader community. Our efforts in these areas demonstrate our concern for the environment, our employees and the continued success of our company. In 2016, West established goals around energy, emission and water reduction using a 2011 baseline.

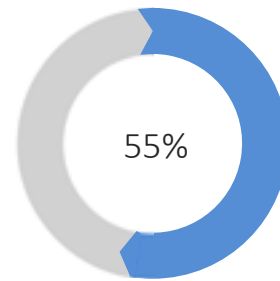

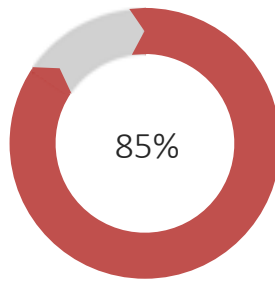

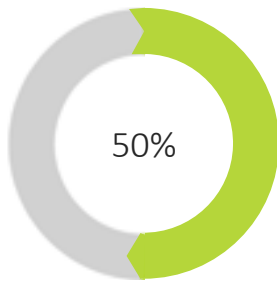

GOAL

25% **Energy** Intensity Improvement by 2020

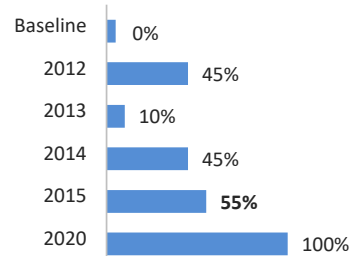

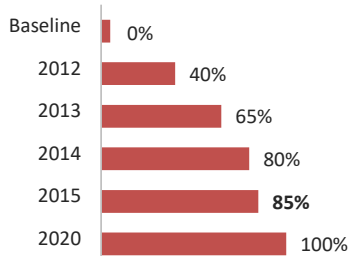

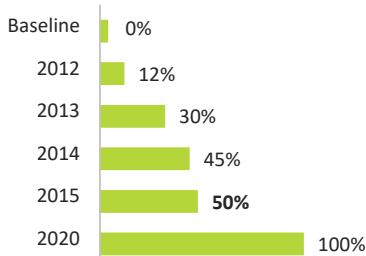

20% **Emission** Intensity Improvement by 2020

15% **Water** Intensity Improvement by 2020

HEALTH AND SAFETY GOALS

Our mission is to partner with our customers from concept to patient, helping them imagine, develop and deliver products that improve lives around the world. In doing this, West provides a safe and healthful environment, free from recognized hazards that may cause serious injury to employees, customers, contractors and visitors. Each year our goal is to have zero incidences. Historically, West has established annual numerical rate reduction goals to decrease and ultimately eliminate incidents in our workplace. In 2017 and beyond we are enhancing our EHS Management System and associated processes to include both lagging and leading indicators to track and drive the EHS process.
