

adaptIQ® ready-to-use vials

adaptIQ® from SCHOTT are high quality, sterile, ready-to-use (RTU) vials for the pharmaceutical and biotech industry to reduce time-to-market and increase flexibility.

The adaptIQ® clip nest is part of the SCHOTT iQ® platform – The Global RTU Standard. The vials are supplied in a harmonized and industry standard tub and nest packaging configuration. The ISO vials are delivered in an EtO-sterilized package that is compliant with relevant ISO standards namely ISO 11040-7 and ISO 21881:2019.

Benefits of using adaptIQ® are e.g. that the vials are clean, sterile and ready for the filling process with no glass-to-glass contact to avoid breakage and maintain high quality with lower total cost of ownership (TCO).
